ENGINEER BELIEVES PROPERTY ALL RIGHT

Enthusiastic Over The
Arizona Gold Lode
Co. Mines

Extensive Development
Plan Will Be
Inaugurated

(From Saturday's Daily.)

So enthusiastic was H. P. Dickinson, a Denver mining engineer, over the results of an expert examination made of the properties of the Arizona Gold Lode Mines company, in the Cherry Creek district, in which he has been engaged for the past week, that before he left here yesterday for Chicago, he wired his associates that the property was all right from every standpoint and that he found it better than represented.

He expressed himself as being astonished at the amount of development done on the different claims for the amount expended and stated that there was more than enough ore already blocked out and in sight to pay for all expenditures made on the claims, and the equipment on the ground. This conclusion had been reached, he said, after actual measurement and careful calculation of the tonnage of the ore bodies opened, only the lowest sample values being taken into consideration.

As a result of his examination of the properties the plan of development agreed upon, subject to his favorable report, will be inaugurated at an early date, and R. H. Burmister, president and general manager of the company, is authority for the statement that forty more miners will be added to the force now employed within the next two weeks. Sinking on the Leghorn shaft, now 368 feet deep, will be pushed until the 1,000-foot level is reached, and stations cut at every 100-foot level, from which drifts will be run on the vein. In the bottom of this shaft there is now two feet of ore and the paystreak at different depths has widened out in places to five and even six feet.

A hoist will be installed at the Gold Lode shaft, now 314 feet deep, and sinking continued to the 500-foot level. Levels will be run from each 100-foot station and the vein will be thoroughly explored by cross cuts.

The 520-foot tunnel on the Bugler vein will be continued through the mountain an additional distance of 1,200 feet, and a 50-foot winze in this tunnel, in which there is a body of ore exposed four feet in thickness, will be continued down 200 feet more, where it is expected the water level will be reached. In the Bugler tunnel the ore body shows an average thickness of three feet, the ore carrying good values in gold.

In addition to the equipment, which now consists of a hoist on the Leghorn shaft, and a 10-stamp mill with four Frue-Vanner concentrators, new Wilfley tables will be added to the concentrating part of the plant and the boilers will be fitted with oil burners, it being the intention to discontinue the use of cordwood for fuel. Additional teams will be employed to haul ore from the different mines in the group to the mill, which will be kept on a steady run, day and night, instead of one shift, as is now the practice.

The examination of the expert, Dickinson, developed the fact that the gold and silver values in the ores show a decided increase as depth is gained, and the discovery was made that while none of the surface ores showed any copper values worthy of consideration there is now good copper percentages in the ores from the lower levels.

The company's holdings, consisting of fifteen claims, are located about sixteen miles east of Dewey, the nearest railroad station on the Bradshaw Mountain railroad.

POSTAL RAISES SALARIES.

Apparently following the lead of other telegraph companies, the Postal Telegraph Cable Co., through its president, Clarence H. Mackay, has announced that salaries of employees from manager to operator will be increased 10 per cent, the increase to affect every Postal office in the United States.

CHINESE MERCHANT DEAD OF OLD AGE

Enthusiastic Over The
Arizona Gold Lode
Co. Mines

(From Saturday's Daily.)

Following the expiration of the period of festivities in celebration of the Chinese New Year, Lew Chung, an aged Chinese merchant, breathed his last yesterday afternoon at 1 o'clock. Deceased was aged about 73 years, and was among the oldest inhabitants of the Chinese quarter here. His death, which is sincerely mourned by his countrymen, was due to old age.

Former Resident Dead.

News reached this city yesterday from Reno, Nev., of the death of John S. McDonnell in that place February 12. The immediate cause of death was Bright's disease, from which he had been a sufferer for a number of years. Deceased was aged 52 years, and a native of England. His remains were interred in Independence, Ia., near the home of his parents and relatives. Surviving him he leaves a wife and four children, two sons and two daughters, the oldest being only 15.

Previous to moving to Nevada about a year ago, he had been a resident of this county for sixteen years. He was a miner by occupation and filled a number of responsible positions with different mining companies here up to about three years ago, when the fatal malady commenced to undermine his constitution.

MISSOURI MAN HERE SEARCHING FOR BROTHER

Latter Thought To Be
Mining In This
Territory

(From Saturday's Daily.)

With a view of locating a brother from whom he has not heard for many years and who, he believes, formerly resided in this county, James C. Callaway, a wealthy farmer and stockman from Howard county, Missouri, is visiting the Territory for the first time. He arrived here at a late hour Thursday night from the east and will leave today for the Verde Valley, to visit with his cousin, C. C. Callaway, a prominent farmer and stockman of that section.

When last heard from his lost brother was engaged in mining in this Territory. Mr. Callaway states that he will visit every camp of note in the Territory before he returns to Missouri, in an effort to locate him, and if unsuccessful will continue his search into California and Nevada.

Grippe or Influenza, whichever you like to call it, is one of the most weakening diseases known.

Scott's Emulsion, which is Cod Liver Oil and Hypophosphites in easily digested form, is the greatest strength-builder known to medical science.

It is so easily digested that it sinks into the system, making new blood and new fat, and strengthening nerves and muscles.

Use Scott's Emulsion after Influenza.

Invaluable for Coughs and Colds.

ALL DRUGGISTS, 50c. AND \$1.00.

BURKE TALKS OF LEGISLATIVE MATTERS

Grows Facetious About
A Cartoon Sent
Him

(From Saturday's Daily.)

Speaking to a Journal-Miner man of legislative matters in general, D. A. Burke, member of the Lower House from this county, who returned yesterday for a few days' visit here, said: "Since the Legislature convened I have not received a line from a resident of this county in reference to any proposed legislation or any bills that have been introduced into either House, with the exception of one letter. I understand that there was a petition sent to the Legislature from Prescott, addressed to the representatives of this county, but it was not received by any of them."

"It is also rumored in Phoenix that a cartoon accompanied the petition or rather, was a part of it, and as neither the petition or the cartoon were ever seen by any of the representatives from Yavapai county, I am seriously considering the idea of introducing a resolution demanding the production of the petition and the cartoon."

"Rumor states that the cartoon is very complimentary to the gentleman representing Yavapai county in the Council and to two of the members in the Lower House. It would be a pity to have both petition and cartoon in the shuffle, because, in my mind, petitions and cartoons of the character mentioned should be made a permanent record and given a prominent place in the history of the Territory."

SHEEP MAN HAS NO KICK COMING HE SAYS

H. J. Gray Thinks The
Conditions Were
Never Better

(From Saturday's Daily.)

H. J. Gray, the Jerome Junction grower, passed through here yesterday, en route home from the Salt River valley, where he recently completed the shearing of his large flock.

"Over 300,000 head of sheep will be sheared in the valley this season," says Mr. Gray, "and a large number will be clipped later at Cordes, in this county. The outlook for a prosperous year is better than at any time since I have been engaged in the business. 'The lamb crop is exceedingly promising and prices of mutton and wool are all that could be desired. Stock healthy and little losses are reported so that taking it on the whole, sheep men have no kick coming in the outlook as good as it now is. A large crop of lambs, plenty of wool on the ranges, and good mutton and wool prices.'"

Every Bottle Warranted

Every bottle of Chamberlain's Cough Remedy is guaranteed, and the dealer from whom it is purchased will refund the money to anyone who is not satisfied after using it.

The many remarkable cures of colds and grip effected by this preparation have made it famous over a large part of the civilized world. It can always be depended upon and is pleasant to take. It not only cures colds and grip, but counteracts any tendency towards pneumonia.

This remedy is also a certain cure for croup, and has never been known to fail. When given as soon as the child becomes hoarse, or even after the croupy cough appears, it will prevent the attack.

Whooping cough is not dangerous when the cough is kept loose and expectoration free by the use of this remedy.

It contains no opium or other harmful substance, and it may be given as confidently to a baby as to an adult.
